25X1

25X1

1. Cape Canaveral Moon Shot - [redacted] reported briefly on the trip made by [redacted] and himself to Patrick Air Force Base and Cape Canaveral to witness the recent moon shot. Press procedures witnessed indicated the necessity to prepare press releases and press relations extremely carefully prior to any CORONA firings. (See COR-0185, dated 15 October 1958.)

2. CORONA Progress - Mr. Bissell discussed briefly his recent involvement with RMD and ARPA in the LL7L/CORONA program and pointed out that the differences in opinion, both professional and administrative, between RMD and ARPA made a difficult program that much more complicated. He said he hoped that the substantive consideration of the program would not be obscured by the antagonisms that have been evident. However in this connection he did say that it would appear that [redacted] under the CORONA program may be dropped and that the 6 inch pioneer version of LL7L may be eliminated.

25X1

A CORONA review meeting will be held in Boston on 28 October in addition to the normal CORONA progress meeting in Palo Alto on 16-18 October.

3. GUSTO Panel Meeting - Mr. Bissell announced that a "final" advisory panel meeting on the follow-on vehicle is tentatively set for 12 November in Boston.
